

PL1400

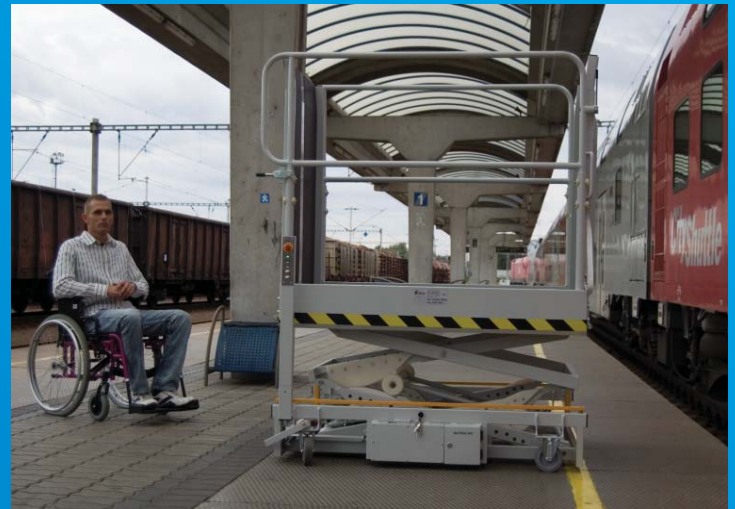

The Mobile Vertical Platform Lift

The LP1400 vertical platform lift has been designed to provide easy access for wheelchair drivers to train wagons. The platform is equipped with adjustable foldable ramps, which width can be set to the width of the particular train car doors. Easy to move and fast and simple to handle, this lift provides an optimal solution for access to trains and stages, lifting up to 1400mm.

Life without barriers

PL1400 - The Train Access Lift

Technical features

External platform dimensions	1205 x 1555 mm (width x length)
Internal platform dimensions	860 x 1400 mm (width x length)
Lifting travel	1150 mm
Maximal lifting height	1400 mm
Height of platform in folded position	250 mm
Maximal lifting capacity	300 kg
Weight of the platform	250 kg
Surface treatment	Galvanized and powder coated in RAL 7035
Number of stops	2
Platform design	Passable in a straight line
Lifting speed	10 mm/s at nominal load
Drive	Elektromechanical linear actuator
Power supply	24V DC, from battery pack
Maximal power	300VA
Noise level	Sound emissions do not exceed 70 dB (A)
